**Subject:** Cleaner version of Asbestos SNUR  
**Attachments:** Asbestos SNUR - Final Draft v OCSPP IO revision (doc compare) 20190408.docx

Good morning Tanya and Brian,

Here is a link (and attached is a copy) of another MS Word document compare that may help you read through the Asbestos SNUR a bit easier. The version you have been reviewing includes OCSPP IO comments on a document compare of the proposed vs. the final rule. The attached document is a comparison between the final draft we sent RCS and the redline strikeout version with OCSPP IO revisions. What I did was accept all changes on the redline strikeout version of the proposed v final version that you have been reviewing, then I compared it to the final draft version that we sent to RCS. This removes all the distracting redline strikeout that occurred since proposal and captures the changes that OCSPP IO made as well as our edits to address their comments. All edits will be in one color, so you may not be able to tell who made the changes.

Please let me know if you have any questions.
